Updates and new features

New in the version 1.6.3

- fix bug with check for multidomen version;
- Improved checking the license code;
- minor bug fixed;

New in the version 1.6.1

- Improved single slide mode (no Pause button);
- no error for hotspots on deleted products;
- integration with Pinterest;
- minor bugs fixed;
- Optimised Javascript files;

New in the version 1.6.0

- migrate to new jQuery plugin (library) Cycle 2;
- automatic connection jQuery if the library is missing;
- optimized to work with vertically oriented slides;
- added the ability to pass in URL starting slide of a lookbook slider;
- minor bugs fixed;

New in the version 1.5.2

- responsive hotspot position (automatic replacement after screen resize);
- one slide degradation to gallery;
- add “generic“ link for slide for areas without hotspots and for gallery view;
- minor bugs fixed;

New in the version 1.5.0

- compatible with magento 1.9;
- compatible with responsive design;
- compatible with jQuery 1.10 and later;
- minor bugs fixed;

New in the version 1.0.4

- ability to incorporate "Add to cart" button in hotspot;
- product thumbnail image and short description in hotspot;
- minor bugs fixed;

New in the version 1.0.3

- multi-domain functionality added
- improved work with mobile touchscreen devices

New in the version 1.0.1

- out of stock items message right in hot-spot
- crossed normal price is displayed with special price if applicable
- ability to add sliders as snippet (block) or widget;
- ability to link any URL from hotspot (not to products in store only);
- ability to disable jQuery if you already have it in layout;
- ability to disable jQuery and slider's libraries inclusion for each slider added as block/widget;
- ability to show the thumbnails of slides instead of pagination;
- 28 transition effects + “random”.

We use Cycle2 jQuery plugin as slider. Cycle2 is a free jQuery slideshow by M. Alsup. It's very flexible, easily customizable and mobile friendly. [Learn more about Cycle2](#)

For Magento 1.4.x-1.5.x Community Edition users

Attention, if you use Magento 1.4.X-1.5.X Community Edition you need to use a special version of Lookbook Professional Pro for this version Magento. The package you need to use is LookBook Pro for Magento 1.4-1.5 (LookBook_pro_for_1.4-1.5.tar) , you can download it by the link provided when you placed your order.

Installation and Upgrade

Step 1. Backup your data.

Step 2. Check Permissions.

Make sure the "app", "js", "media" and "skin" directories of your Magento and all directories inside it have full written permissions or set permissions on the each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permission at

http://www.magentocommerce.com/wiki/magento_filesystem_permissions

Step 3. Disable Compilation.

Log into Magento **Admin Panel** and go to **System > Tools > Compilation** and disable the compilation. After step 6 you can run the compilation process again.

Step 4. Upload Files.

Upload all folders from the extension package to the installation directory of your Magento software using an FTP client.

Step 5. Clear cache.

Go to **System > Cache Management**.

Select all cache types, Actions -> Refresh. Submit.

Step 6. Re-login.

Log out and then log back into Magento **Admin Panel**.

If you have done everything correctly you should see **Altima** tab with **"Lookbook extension"** under **System > Configuration** of your **Magento control panel**

At this point your LookBook Professional extension initial set-up is complete (if you use Custom Themes check next page).

See next sections of this manual to find out how to configure Lookbook extension (create Sliders, create slides, upload images and define hotspots to your Magento website pages)

Installation (Custom Theme)

Please do the next steps after the Installation:

1. Copy

app/design/front-end/base/default/layout/lookbookslider.xml to app/design/front-end/default/your_theme/layout/

OR

app/design/front-end/enterprise/default/layout/lookbookslider.xml to
app/design/front-end/enterprise/your_theme/

2. Copy

app/design/front-end/base/default/template/lookbookslider.phtml to
app/design/front-end/default/your_theme/template/

OR

app/design/front-end/enterprise/default/template/lookbookslider folder to
app/design/front-end/enterprise/your_theme/template/

3. Copy

skin/front-end/base/default/lookbookslider folder to skin/front-end/default/your_theme/lookbookslider

OR

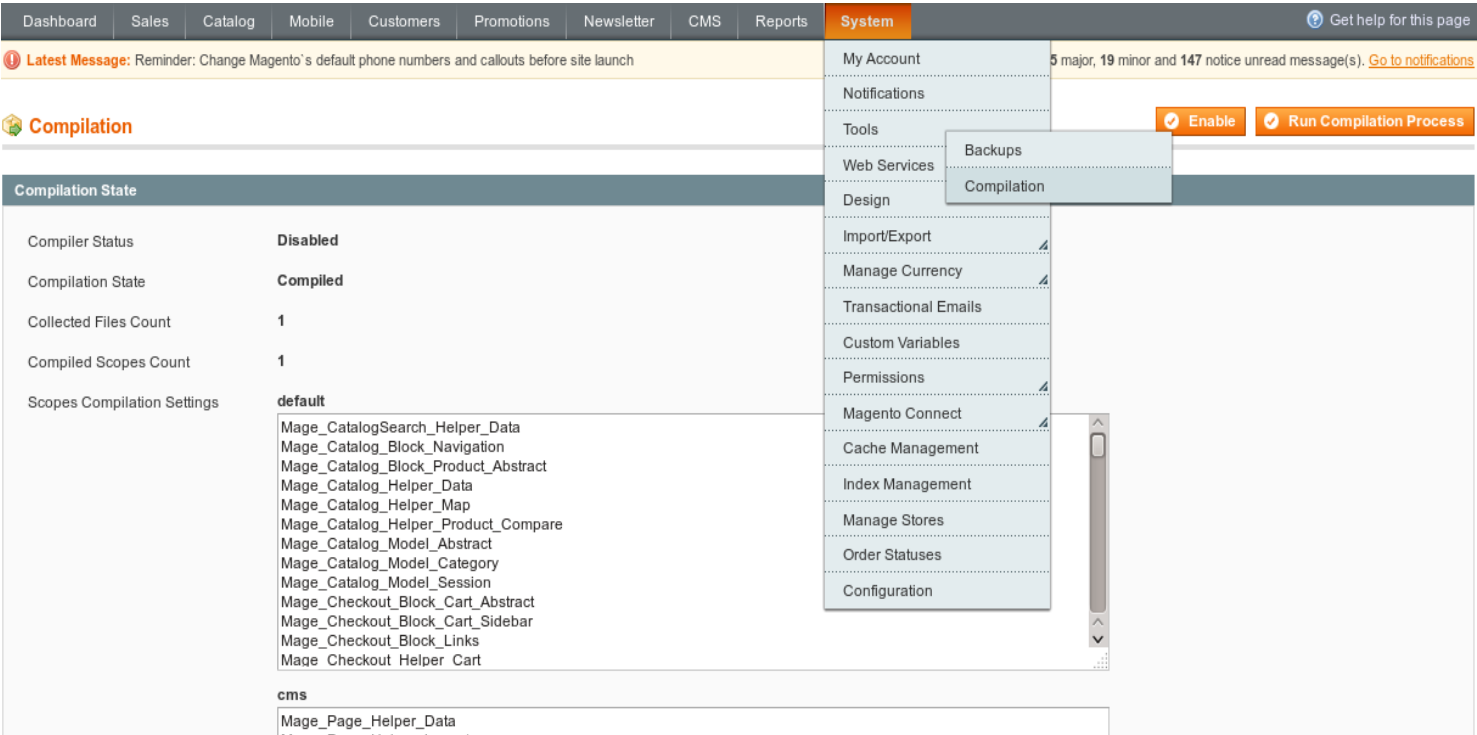

skin/front-end/base/default/lookbookslider folder to skin/front-end/enterprise/your_theme/lookbookslider

Migration from the old version to 1.6.3.

Step 1. Backup your data.

Step 2. Disable Compilation.

Log into Magento **Admin Panel** and go to **System > Tools > Compilation** and disable the compilation.

After step 6 you can run the compilation process again.

Step 3. Upload extension files.

Upload all folders from the extension package to the installation directory of your Magento software using an FTP client. Replacing the old files with the new from the extension package.

Step 4. Clear the cache.

Go to **System > Cache Management** .

Cache Storage Management

✖ Flush Magento Cache

✖ Flush Cache Storage

Select All | Unselect All | Select Visible | Unselect Visible | 8 items selected

Actions

Refresh

Submit

Cache Type	Description	Associated Tags	Status
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	<div>ENABLED</div>
<input checked="" type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	<div>ENABLED</div>
<input checked="" type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	<div>ENABLED</div>
<input checked="" type="checkbox"/> Translations	Translation files.	TRANSLATE	<div>ENABLED</div>
<input checked="" type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	<div>ENABLED</div>
<input checked="" type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	<div>ENABLED</div>
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	<div>ENABLED</div>
<input checked="" type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	<div>ENABLED</div>

Additional Cache Management

Flush Catalog Images Cache	Pregenerated product images files.
Flush JavaScript/CSS Cache	Themes JavaScript and CSS files combined to one file.

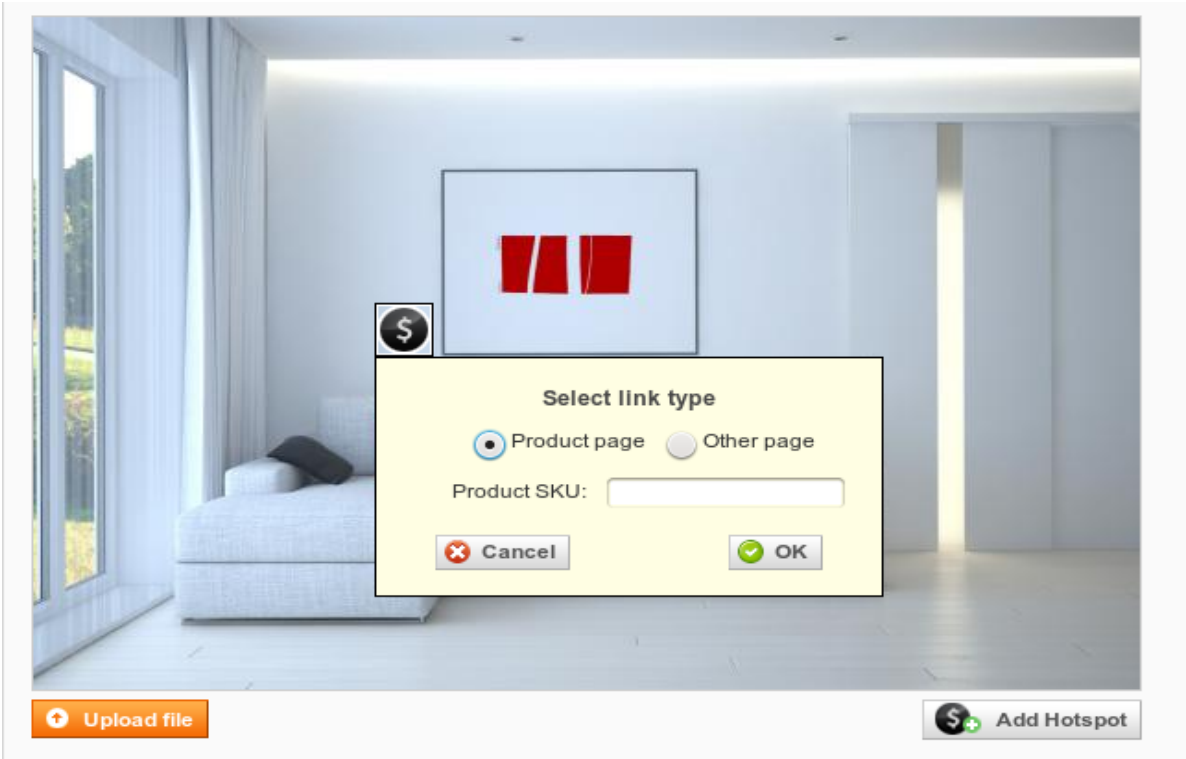

Select all cache types, Actions -> Refresh. Submit.

Step 5. Re-login.

Log out and then log back into Magento **Admin Panel**.

Step 6. Create new hotspots.

Create new hotspots instead of the old ones, replacing them. It is recommended step to make sure that the hotspots are displayed at correct position in responsive design. You may skip that step if don't employ responsiveness.

LookBook Professional Configuration

After the Installation go to **CMS → Lookbook Professional → Settings** or **System → Configuration → Altima → Lookbook Professional**.

Add Hotspot

Hotspot can be dragged and re-sized.

11. Select the type of link you want to assign to hotspot (product page or other link). Enter the product SKU or link text and URL (with http://). Press OK.
- In case of product page was selected the system will check it. If the product with entered SKU exists, the

hotspot will be created.
If you don't remember a product SKU, click “**Products List**” to open the Products list in new window(tab).

- 12. If you click on the hotspot, you can edit it (change hotspot position, size, product SKU) or delete it.
- 13. Press “**Save slide**”.
- 14. If you created several slides, you can see something like this list.
- 15. Now you can see the slider on the selected pages (front-end).

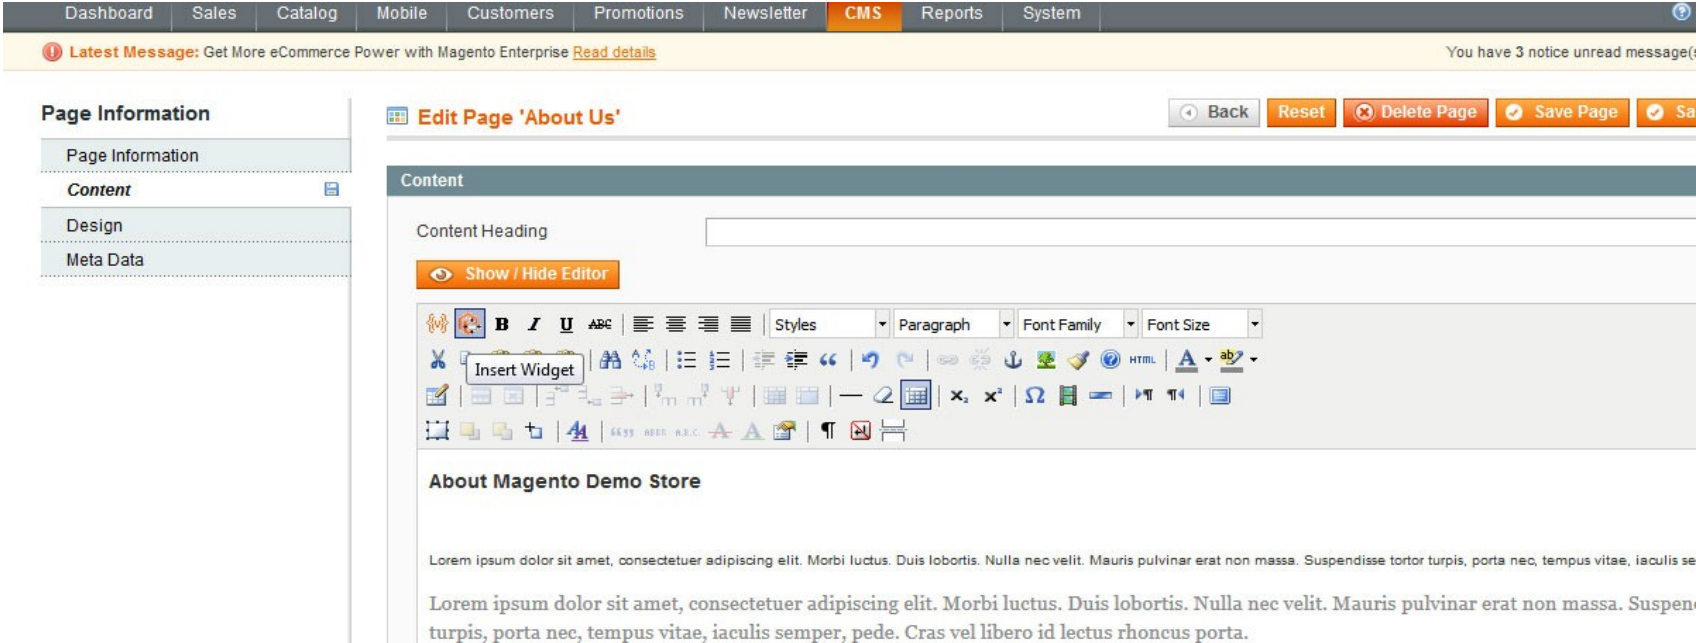

with 2 hotspots and default link

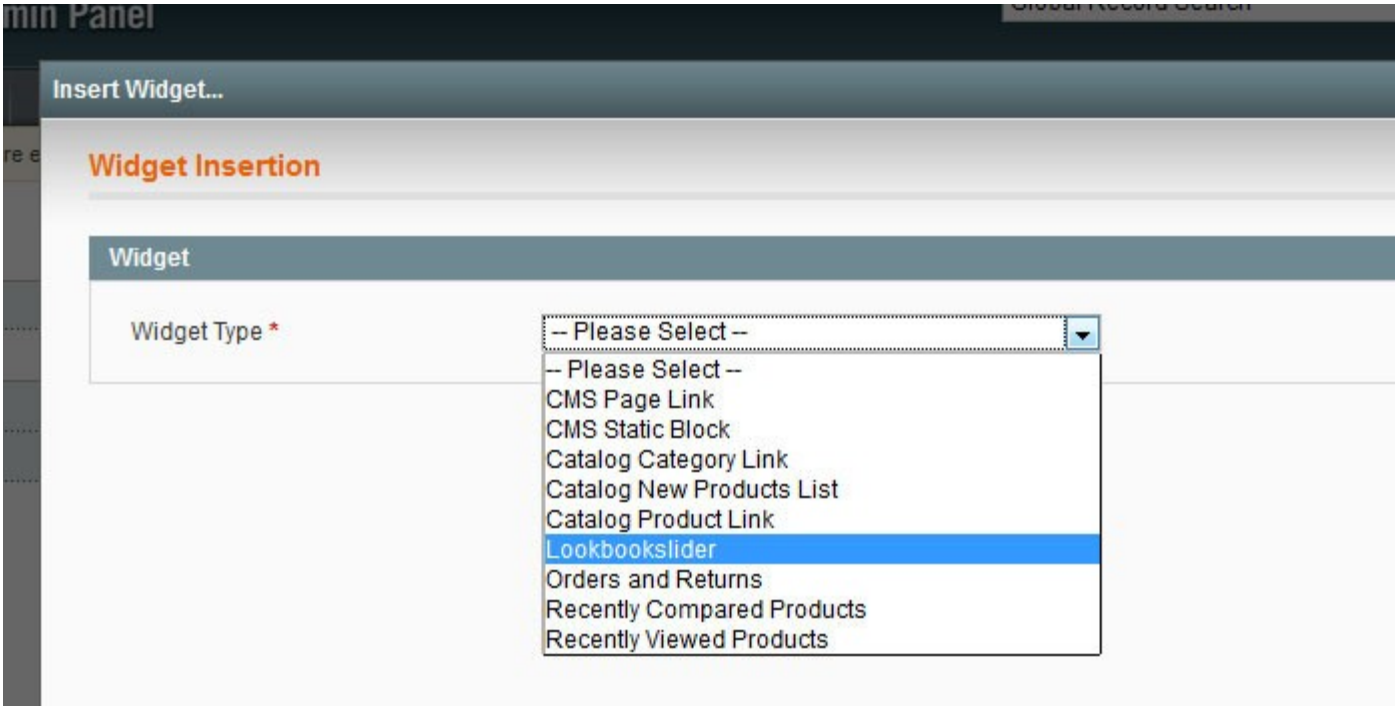

How to insert Lookbook Slider as a widget

This feature can be useful if you have some javascript conflicts or can't insert it in the usual way. For example you need to insert Lookbook slider into “About Us” page.

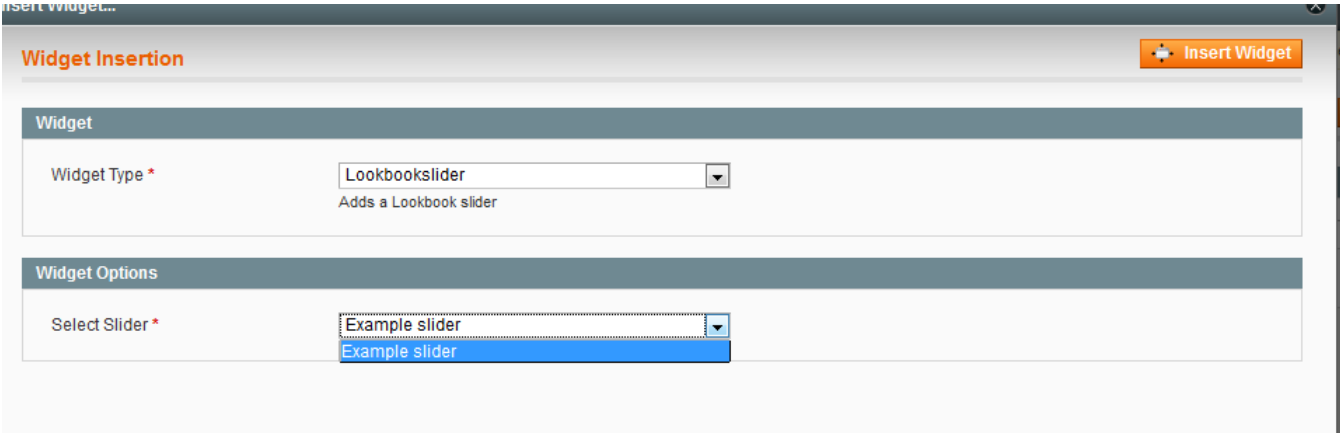

1. Go to CMS → Pages → About Us → Content tab
2. Pace the cursor in place you want to insert widget and click “Insert widget” button.

3. Select Lookbookslider widget type.

4. Select Slider and click Insert Widget.

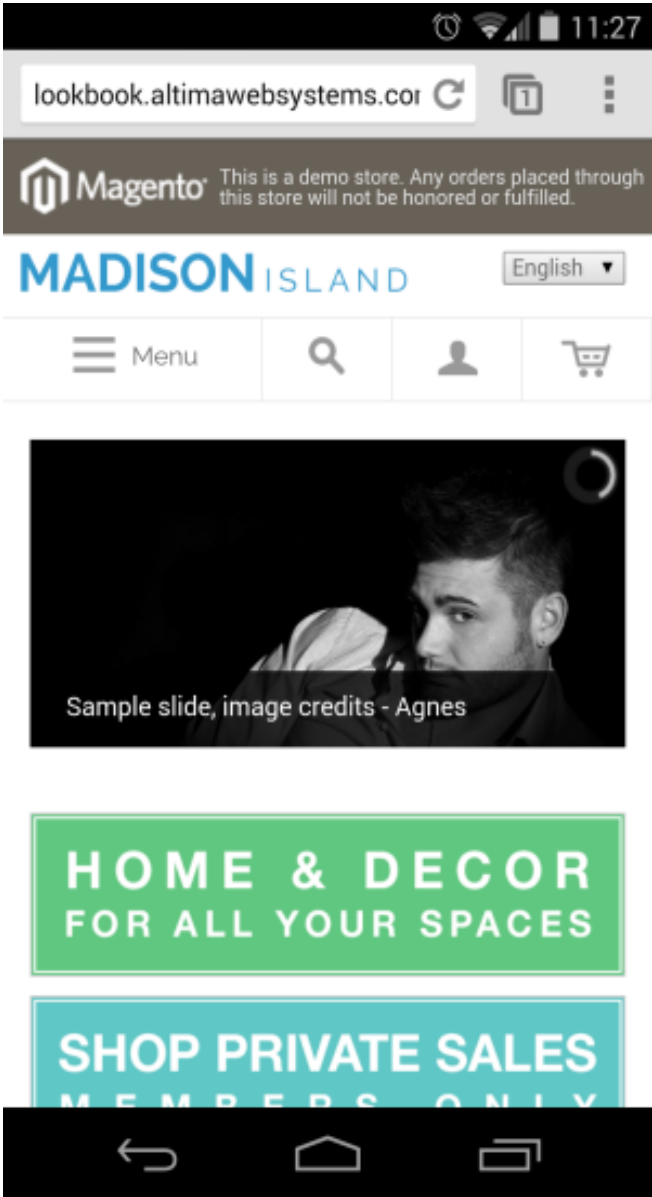

5. Save About Us page and see how it looks.

Note that if you insert more than one widget per page you need to select “No” for Javascript and jQuery inclusion drop-downs in “Widget Information” tab for all, but the first slider.

Responsiveness

Starting from version 1.5.0 Altima Lookbook Professional extension supports responsiveness. Few important notes that you about how it is done:

- The page/template where you insert slider should support responsiveness too;
- If the area for lookbook sliders becomes 400 pixels or more narrow the slider with hotspot will **degrade to the simple gallery** with only the photos and next/previous control (sliding gestures also works) (no hotspots) like on the screenshot below. We believe that on smaller screens it will be too hard from usability point of view to tap and click on hotspots, there isn't enough space for that. However the limit of 400 pixels can be changed in the lookbookslider.css file, situated in \skin\frontend\base\default\lookbookslider\css\ folder. The parameter is defined in the line 569: - "@media screen and (max-width:400px)

Also for the situations when slider width is below 600 pixels we apply special treatment for hotspots: due to limited space we don't show product image and description. You can change the width when this logic is applied editing `/skin/frontend/base/default/lookbookslider/css/lookbookslider.css` file, line 304, parameter `@media screen and (max-width:600px) {`

Calling specific slide in slider via URL

You can call Altima Lookbook sliders to start from specific slide in URL.

For this, you only need add to url in the end this value ?slide=N , where N is the number of the desired slide.

Sample:

We want to start a slider from 3rd slide. Your link will have the following form:

http://example.com/your_page.html?slide=3

And then the slider will start play from the third slide.

Deactivation

Step 1. Disable Extension.

Log into Magento **Admin Panel**

Go to **System** → **Configuration** → **Altima** → **Lookbook Professional** → **Enable**

Select "No" to deactivate the extension. Click “**Save Config**” button.

The extension is now deactivated.

Step 2. Clear cache.

Go to **System** > **Cache Management** .

Clear (refresh) the store cache.

Full Uninstallation

Step 1. Disable Extension as above (Deactivation - Step 1).

Step 2. Delete Files.

Using an FTP client delete the next files.

IMPORTANT! BE VERY CAREFUL WHEN DELETING FILES OR FOLDERS, IT'S POSSIBLE YOU CAN ACCIDENTLY DELETE WRONG FILES OR FOLDERS.

\app\etc\modules\Altima_Lookbookslider.xml

\app\design\adminhtml\default\default\layout\lookbookslider.xml

\app\design\front-end\base\default\layout\lookbookslider.xml

Step 3. Delete Folders.

Using an FTP client delete the next folders.

\app\code\local\Altima\Lookbookslider\

\app\design\adminhtml\default\default\template\lookbookslider\

\app\design\front-end\base\default\template\lookbookslider\

\js\lookbookslider\

\media\lookbookslider\

\skin\adminhtml\default\default\lookbookslider\

\skin\front-end\base\default\lookbookslider\

Step 4. Delete Data from the DataBase.

Run the following scripts on your server (MySQL) to delete data from the database:

```
DELETE FROM core_config_data WHERE path LIKE 'lookbookslider/general/%';
```

```
DELETE FROM core_resource WHERE code = 'lookbookslider_setup';
```

```
DROP TABLE IF EXISTS 'lookbookslider';
```

```
DROP TABLE IF EXISTS 'lookbookslider_category';
```

```
DROP TABLE IF EXISTS 'lookbookslider_page';
```

```
DROP TABLE IF EXISTS 'lookbookslider_slide';
```

Step 5. Clear Cache.

Go to **System** > **Cache Management** .

Clear the store cache.

Step 6. Clear Cache in your Browser.
